

**Resolution Demanding Elected Officials Reject  
World Economic Forum Agendas**

Whereas the World Economic Forum chairman Klaus Schwab announced the kick-off of the 53rd annual meeting of political leaders including a high-level Chinese delegation of corporate executives and activists in Davos Switzerland declaring that it will focus on rededicating its members to a progressive climate and social justice agenda in what he described as unprecedented multiple crises;

Whereas the World Economic Forum is a meeting of the deep state globalists scheming to design a new system for work Year and employment under the names the great reset, the new world order, the fourth industrial revolution, and build back better;

Whereas the WEF 2019 signed a strategic partnership with the United Nations to bring the business community into the implementation of Agenda 2030, the UN's master plan for humanity using 17 sustainable development goals that amount to global redistribution of wealth;

Whereas America's constitutionally limited form of government and high level of individual liberty resulting in Prosperity and the highest standard of living on earth is contradictory to the worldwide central planning, control, and tyranny of the WEF;

Be it resolved that the delegates of this 14th Congressional District convention of the Georgia Republican Party formally request that our elected officials reject the plans and policies of the WEF and instead support and defend the United States Constitution, our God-given freedoms, property rights, and the successful and proven American way of Life.

Adopted this 22nd day of April 2023.

Convention Chairman 

Convention Secretary
